1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the problem and the objectives of the research. It also mentions the scope of the study and the methods used.

2. The second part of the report is a detailed description of the experimental work. It includes a description of the apparatus used, the procedure followed, and the results obtained. It also discusses the errors and limitations of the experiment.

3. The third part of the report is a discussion of the results. It compares the results with the theoretical predictions and with the results of other experiments. It also discusses the implications of the results and the conclusions drawn from them.

4. The fourth part of the report is a conclusion. It summarizes the main findings of the study and states the conclusions drawn from them. It also mentions the limitations of the study and suggests directions for further research.

5. The fifth part of the report is a list of references. It lists the books, articles, and other sources used in the study.
